

Marcus Oil & Chemical

Material Safety Data Sheet

Oxidized Polyethylene Homopolymers

SECTION 1: Chemical Product and Chemical Identification

Product: Marcus 3300, 3400P, 3400T, 3500

Product Description: White pastilles, prills, flakes, and powder

Chemical Name: Oxidized Polyethylene Wax

Chemical Family: Oxidized Polyethylene Homopolymer Wax

Manufacturer: MARCUS OILS & CHEMICALS PVT. LTD. (MOCPL)
Vill: Kasberia, HPL Link Road, PO-Shibramnagar,
Haldia-721635, Purba Medinipur, W.B., India.
Ph : 091 3224 276541, Fax : 091 3224 276696,
E-mail: contactus1@marcusoil.com
Web Site: www.marcusoil.com

SECTION 2: Composition

<u>Ingredient Name</u>	<u>CAS #</u>	<u>WEIGHT %</u>
Oxidized Polyethylene Wax	68441-17-8	100

SECTION 3: Hazards Identification

EMERGENCY OVERVIEW

High level of dust in the atmosphere may present a dust explosion hazard. These products are not hazardous as defined in 29CFR 1910.1200.

Potential Health Hazards:

Skin Not a primary irritant. Molten wax will cause burns upon contact.

Eyes Molten wax fumes may be slightly irritating to eyes. Dust particles may cause burns upon contact.

Inhalation Molten wax fumes may cause mild respiratory irritation. Powder may cause minor nuisance irritation.
Exposure limit for total product (threshold limit value):

Marcus Oil & Chemical

Material Safety Data Sheet

Oxidized Polyethylene Homopolymers

OSHA regulation 29 CFR 1910.1000 recommended by ACGIH
5 mgms/m³ (respirable dust)
10 mgms/m³ (total dust)

Ingestion
Symptoms

No known effects. Products have low toxicity (acute oral > 2500 mg/kg).
Mild irritation as noted above.

SECTION 4: First Aid Measures

Skin Contact

If burned by hot product, obtain medical attention immediately. In the event of skin contact with product under other conditions, wash thoroughly with soap and water. Removal of product from skin may be aided by use of waterless hand cleaner.

Eye Contact

If hot product splashes into eyes, flush immediately with clear cold water. Contact physician immediately.

Inhalation

If overcome by fumes, immediately remove from exposure and call a physician. If breathing is irregular or has stopped, start resuscitation. Administer oxygen if available.

Ingestion

Product are not acutely toxic and in any case ingestion is unlikely to occur. If a product is ingested, follow appropriate action as when any foreign object is swallowed.

Chronic Health

No know chronic health effects.

SECTION 5: Firefighting Measures NFPA: Health 0, Fire 1, Reactivity 0

Flammability Properties

Flammability Classification: Combustible solid

Flash Point: >450°F
Method: ASTM D-92

Auto Ignition Temperature: Not known

Flammability Limits

Upper: Not applicable
Lower: Not applicable

Extinguishing Media

Use carbon monoxide, dry chemical or fine water spray. Avoid direct stream of water as product will float and can re-ignite on the surface of the water stream.

Marcus Oil & Chemical

Material Safety Data Sheet

Oxidized Polyethylene Homopolymers

Firefighting Instructions

Material will not burn unless preheated. Do not enter confined fire space without full bunker gear (helmet with face shield, bunker coats, gloves and rubber boots), including a positive pressure NIOSH approved self-contained breathing apparatus. Cool fire exposed containers with water. In powder form, static electricity may lead to explosions. See NFPA Bulletin 654. Take precaution as material may cause floors and stairs to become slippery.

SECTION 6: Accidental Release Measures

Release Response:

Use good housekeeping practices since spilled material may be a slipping hazard. When dealing with powdered grade, keep away from heat, flame, and remove ignition sources. Collect material in a drum (may be fiberboard) or carbon using care to scatter as little dust as possible. May burn although not readily ignitable. Use cautions judgment when cleaning up large molten spills. With small molten spills wear respirator and protective clothing as appropriate. Shut off source of leak if safe to do so. Dike and contain. Allow wax to cool and remove as solid.

SECTION 7: Handling and Storage

Handling:

Avoid breathing fumes from heating process. Avoid spillage as floors can become slippery.

Storage:

Avoid excessive heat and strong oxidizing agents. Use adequate ventilation during heating process or if dusty conditions occur during handling of powdered material. For storage and ordinary handling, general ventilation is adequate.

SECTION 8: Exposure Control and Personal Protection

Engineering Controls:

Use adequate ventilation during heating process, or if dusty conditions occur during handling of powdered material. For storage and ordinary handling, general ventilation is adequate.

Personal Protection:

Skin Protection: Wear heat protective gloves and long sleeve clothing if there is potential for contact with heated materials.

Eye Protection: Wear safety glasses as minimum protection. Consult you standard operating

procedures or safety professional for advice. Use protective eye and face devices that comply ANSI Z87.11-1987.

Respiratory: Use a NIOSH approved dust respirator, if dusty conditions prevail. Use an organic vapor respirator when melting or conveying product.

SECTION 9: Physical and Chemical Properties

Appearance: White pastilles, flakes, or powder

Odor: Typical mild waxy odor

Density: 0.94-0.98

Water Solubility: Negligible

pH: Not applicable

Boiling Point: Not applicable

Melting Point: 180° -260°F

Vapor Pressure: Not applicable

Vapor Density: Not applicable

Evaporation Rate: Not applicable

SECTION 10: Stability and Reactivity

Chemical Stability: This product is stable at normal conditions.

Conditions to Avoid: Avoid contact with strong oxidizing agents

Incompatible With: Strong oxidizing agents.

Hazardous Products Of Decomposition: Carbon monoxide, carbon dioxide, and combustible gases may be generated.

Hazardous Polymerization: Will not occur.

Reaction with Air: Does not react with air or other common materials.

Oxidized Polyethylene Homopolymers

SECTION 11: Toxicological Information

Skin Effects: No skin effects are expected from polymer contact.

Oral Effects: Acute oral toxicity in rats: LD50>2500 mg/kg

SECTION 12: Ecological Information

Ecotoxicity: Ecotoxicity is expected to be low based on the low water solubility of the product.

Environmental Fate: No information found in our selected references.

Bioaccumulation: Not expected to occur.

SECTION 13: Disposal Considerations

RCRA:

The unused product is not a RCRA hazardous waste if discarded. Products are organic in nature and not biodegradable. Discard unused material as non-hazardous organic solid waste. Dispose of product in an appropriate facility in compliance with local state and federal regulations.

SECTION 14: Transportation Information

US DOT HAZARDOUS CLASS: Not regulated

US DOT ID Number: Not applicable

SECTION 15: Regulatory Information

Toxic Substance Control Act (TSCA)

TSCA Inventory Status: Products are listed on TSCA Chemical Inventory

Other TSCA Issue: None

SARA Title III/CERCLA:
